Diamond Antenna Triplexers are used to split or combine HF, VHF, and UHF signals. These triplexers may be used for combining three transceivers or transceiver connectors with different band ranges onto one coax feed line.

Diamond triplexers feature a high-quality aluminum case with a black finish.

The Diamond MX-3000 is a mobile triplexer with a single SO-239 input into three outputs connected to 14 inch cable with various outputs of 2m, 70cm and 23cm. \*
