black fiberglass, UV protected

 specially reinforced multilayer winding

These 4m long telescopic tubes are perfect for **building portable 1ele quad antennas for 20-15-10m**. They are identical to the upper 4 segments of our 12m HD fiberglass poles.

The 4m tubes can be attached to our 12m or 18m fiberglass poles to form the **horizontal quad spreaders**: [Click here for an example photo of a portable 20-15-10m quad built on our 12m HD fiberglass pole](#)].
